

## **Classroom Activity: Let's Talk Safety**

As simple as it sounds, safety is a matter of communicating with one another.

In many cases, both at school and in the real world, if we speak out and let someone know when we see someone doing something wrong, we're labeled a tattletale.

As a class, discuss how a system could be put in place for reporting unsafe behaviors to ensure none of us get hurt.

### **Discussion Guide:**

Is a recognition or award system for safe behavior an effective way to promote safety?

What are each of our own responsibilities for being safe?

What can we gain if we all look out for one another?
